

Think Green

Partner

With Philips Monitors you can show how much you care.

Save Energy
A range of innovative energy-efficient solutions all-in-one monitor.

Save Costs
The same high performance you expect from Philips but with much lower energy costs.

Ethical Approach to Product Lifecycle
From mining communities to plastic recycling and CO2 reduction, Philips are leading the way.

Fighting Poverty
Philips are empowering communities with their Mines to Markets program which supports best practice in artisanal mining communities.

Reforestation
The Philips Monitors Forest has 17,678 trees planted so far as part of Tanzania's reforestation drive.

Achieving amazing results!

Be part of Philips' exciting sustainability projects helping to support the environment as well as communities involved in the product lifecycle which we all believe should be as inclusive and empowering as it is considerate and progressive.

Just take a look at how we are helping the planet:

441.95 Tons of CO2 absorbed per year

1,767.80 Tons of O2 created per year

707.12 Work Hours created per year

Speak with one of our team today and let's help you create a less cluttered desk with a more power-friendly monitor and a dedicated approach to ethical technology.
